Chief, Engineering Division, OC

Residual Inventory, RD-107, Task Order 4

25X1

This memorandum will confirm a telephone conversation between [redacted] of OC-E and [redacted] of the Contract Administration Branch. The contractor listed a test loop as the only residual inventory under this contract. This test loop is valueless, and the contractor should be instructed to dispose of it. The contractor did not list eight experimental ferrite rods and a ferrite antenna matrix, which are the only residual inventory items of value. [redacted] has taken delivery of this material from the contractor and has delivered it to the Supplemental Programs Division Supply Officer.
